Dr. Antonino Salmeri, Co-Chair, [antonino.salmeri@spacegeneration.com](mailto:antonino.salmeri@spacegeneration.com)

*In a decisive time for action, this document seals a new global commitment: a Pact for the Future.  
A Pact for a Future in which we have achieved sustainable development for all nations.  
A Pact for a Future in which we have ended military conflicts for the benefit of all innocents.  
A Pact for a Future in which science and technology have brought prosperity all over the world.  
A Pact for a Future in which the youth has taken its rightful place at the core of decision-making.  
A Pact for a Future in which the interest of future generations influences all decisions affecting them.  
A Pact for a Future in which the exploration and use of outer space is truly sustainable and open for all.  
A Pact for a Future in which peace, unity and solidarity have replaced war, division and rivalry.*

- 1) *Recognising the benefits space applications have for promoting sustainable development, particularly in developing countries, encourage investment in space sciences and technology to promote growth.*
  
- 1) *Promote adherence to Article IV of the Outer Space Treaty of 1967 by pledging to:*
  - *refrain from the placement of any weapon of any kind in outer space;*
  - *refrain from the intentional destruction of space objects;*
  - *refrain from the involvement of any military in the exploration and use of the Moon.*
  
- 1) *Encourage investment in and adoption of innovative technologies for improved space operations, environmental protection, and disaster risk reduction.*
- 2) *Coordinate a digital governance framework to guide global, regional, and national approaches around shared principles, priorities, and objectives to ensure that technological advancements*

- 1) *Strengthen existing avenues for youth participation in UN decision-making processes and develop new ones, such as a standing UN Youth Town Hall.*
- 2) *Promote a global intergenerational dialogue on sustainability, including educational initiatives and advocacy campaigns aimed at raising awareness on the damages we are causing to future generations.*
- 3) *Adopt concrete measures for meaningful youth engagement and future-proofed decision-making in sectors critically related to their interests, such as the space or digital sectors.*

*As representatives of young and future generations, we believe that the Summit of the Future provides us with a unique opportunity to secure the long-term sustainability of outer space activities for the benefit of all countries and future generations. In view of the preparation of the Zero Draft for the Pact for the Future, SGAC is delighted to propose the inclusion of an “Intergenerational Pact for Space Sustainability”, or IPASS,*
